

Java Program Using do while

```
package Application;
public class classwhile {

    public static int findmax(int arr[])
    {
        int i=0;
        int max=arr[0];
        do
        {
            max=arr[i];
        }while(arr[i]>max);
        return max;
    }
}
```

Testing Program using TestNG

```
package testngpackage;

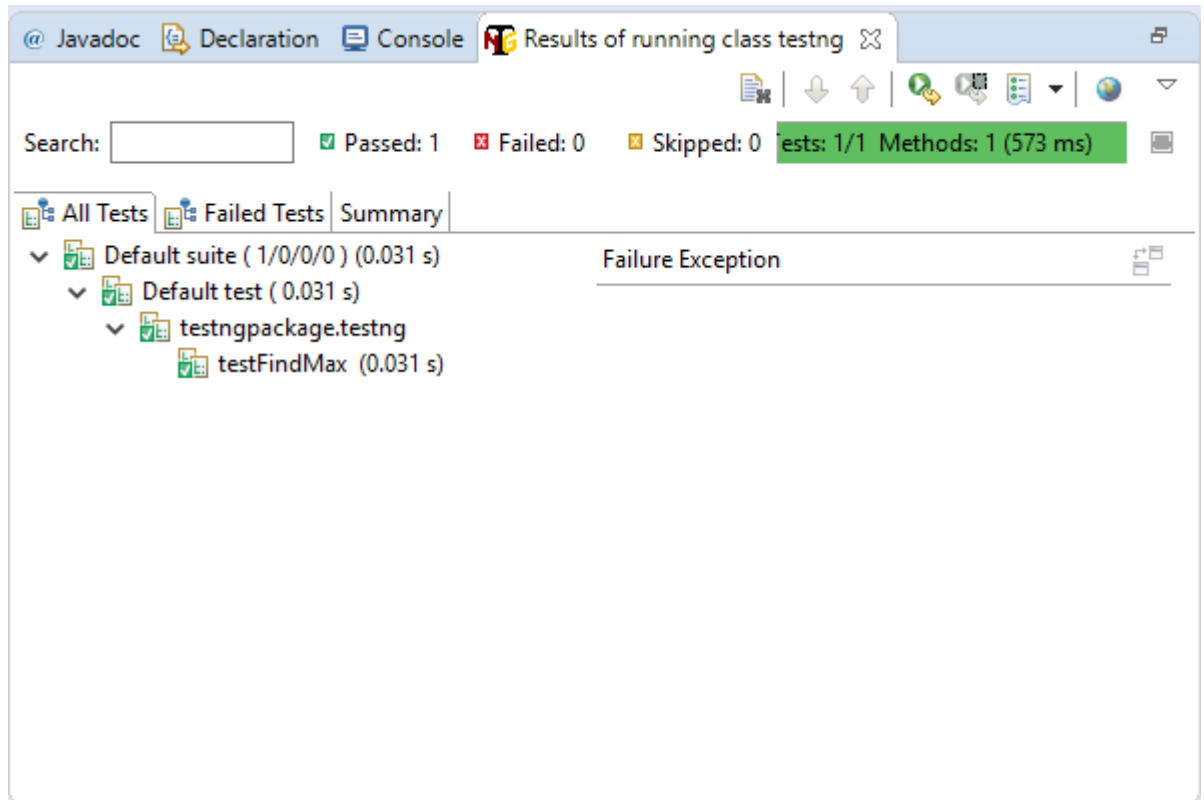

import org.testng.Assert;
import org.testng.annotations.*;
import application.classwhile;

public class testng {

    @Test
    public void testFindMax()
    {
        Assert.assertEquals(15,classwhile.findmax(new int[]{15,13,1,8}));
    }
}
```

Testing Program using TestNG

```
package testing;
```

```
import org.testng.Assert;  
import org.testng.annotations.*;
```

```
import Application.classwhile;
```

```
public class testngtest {  
  
    @Test  
    public void testFindMax()  
    {  
        Assert.assertEquals(8,classwhile.findmax(new int[]{15,13,1,8}));  
    }  
  
}
```

OUTPUT:

The screenshot shows the TestNG results in an IDE console. The title bar reads "Console" and "Results of running class testngtest". Below the title bar, there is a search field and a summary bar indicating "Passed: 0", "Failed: 1", and "Skipped: 0". The summary bar also shows "Tests: 1/1" and "Methods: 1 (567 ms)". The test results are displayed in a tree view under the "All Tests" tab. The tree structure is as follows:

- Default suite (0/1/0/0) (0.024 s)
 - Default test (0.024 s)
 - testng.testngtest
 - testFindMax (0.024 s)

The "testFindMax" method is marked as failed, indicated by a red 'X' icon. The "Failure Exception" column is visible on the right side of the tree view.

    }  
}
```

Software Testing Lab

OUTPUT :

The screenshot displays the test runner interface of an IDE. At the top, a toolbar contains various icons for test management. Below the toolbar, a status bar indicates the test run has finished after 0.047 seconds. A progress bar shows the results: 1/1 runs, 0 errors, and 1 failure. The test suite 'JUnit.junittest [Runner: JUnit 4] (0.000 s)' is expanded, showing a single test case 'testfindmax (0.000 s)' which has failed. To the right of the test case list, the 'Failure Trace' is visible, showing a 'java.lang.AssertionError: testing for max value expect' at 'JUnit.junittest.testfindmax(junittest.java:14)'. A scrollbar is located at the bottom of the test case list.

Finished after 0.047 seconds

The screenshot displays the Selenium IDE 2.9.1 interface. The title bar reads "login (untitled suite) - Selenium IDE 2.9.1". The menu bar includes "File", "Edit", "Actions", "Options", and "Help". Below the menu is a "Base URL" field. A toolbar contains a "Fast" vs "Slow" slider, a "Run" button (green play icon), a "Stop" button (red stop icon), a "Refresh" button (circular arrow), and a "Clock" icon. The main area is divided into a "Test Case" sidebar on the left and a "Table" view on the right. The sidebar shows a test case named "login". The "Table" view has two tabs: "Table" and "Source". The "Table" tab is active, showing a table with three columns: "Command", "Target", and "Value".

Command	Target	Value
open	file:///C:/Users/ASHOK_PC/...	
click	css=input[type="button"]	
assertAlert	Wrong User name or Password	
type	id=password	bharatesh
click	css=input[type="button"]	
assertAlert	Correct!	

Below the table, there are input fields for "Command", "Target", and "Value", along with "Select" and "Find" buttons. At the bottom left, the status shows "Runs: 0" and "Failures: 0".

Software Testing Lab

OUTPUT:

Iterative Process

```
package Application;

import java.util.Scanner;

public class factorailIT {

    public static void main(String[] args) {

        int fact=1;

        Scanner scan=new Scanner(System.in);

        System.out.println("Enter any positive number:");

        int num=scan.nextInt();

        while(num<0)

        {

            System.out.println("Please Enter a positive integer");

            num=scan.nextInt();

        }

        for(int i=1;i<=num;i++)

            fact=fact*i;

        System.out.println("Factorial is =" +fact);

    }

}
```

Recursive Process

```
package Application;

import java.util.Scanner;

public class factRec {

    public static void main(String[] args) {

        int fact=1;

        Scanner scan=new Scanner(System.in);

        System.out.println("Enter any positive number:");

        int num=scan.nextInt();

        while(num<0)

        {

            System.out.println("Please Enter a positive integer");

            num=scan.nextInt();

        }

        int result=factorial(num);

        System.out.println("Factorial of "+ num + " is " + result);

        }

    public static int factorial(int n)

    {

        int result=1;

        for(int i=1;i<=n;i++)

        {

            result=result*i;

        }

        return result;

    }

}
```
